CABLE TERMINATION

BLIT Cable Ferrules

Precision-formed cable ferrules designed for secure wire end termination, organized conductor strands, and reliable connections.

KEY PRODUCT FEATURES

- ✓ **Precision-Formed Construction**
- ✓ **Secure Crimp Termination**
- ✓ **Organised Conductor Strands**
- ✓ **Multiple Size Options**

Manufactured to strict British Standards, ensuring high durability, verified ratings, and dependable operation.

PRODUCT OVERVIEW & ENGINEERING DESIGN

BLIT Cable Ferrules consolidate multi-stranded flexible copper conductors into durable solid pins, preventing wire splaying, strand breakage, and short circuits under screw-clamp terminals.

TECHNICAL SPECIFICATIONS

TECHNICAL PARAMETER	SPECIFICATION & RATING VALUE
Tube Material	High-Purity Seamless Copper Tube, Bright Tin-Plated
Insulation Collar	Halogen-Free Flame-Retardant Polypropylene (DIN 46228-4)
Wire Range	0.5 mm² to 50 mm² (Single Entry & Twin Conductor Variants)
Termination Function	Consolidates Stranded Wires, Prevents Fraying & High Resistance
Temperature Rating	Continuous Operating Range up to 105°C
Connection Integrity	Forms Gas-Tight High-Conductivity Crimp Joint
Standards Compliance	DIN 46228 Part 4 / UL Standards
Recommended Applications	Industrial Control Enclosures, PLC Wiring, Switchgear Terminal Blocks
