CABLE TERMINATION

BLIT Copper Cable Lugs

High-conductivity copper cable lugs designed for secure crimp termination, dependable electrical throughput, and lasting durability.

KEY PRODUCT FEATURES

- **High-Conductivity Copper**
- **Durable Construction**
- **Secure Crimp Termination**
- **Multiple Size Options**

Manufactured to strict British Standards, ensuring high durability, verified ratings, and dependable operation.

PRODUCT OVERVIEW & ENGINEERING DESIGN

BLIT Copper Cable Lugs are forged from seamless 99.9% electrolytic copper tube with thick electro-tin plating to ensure maximum electrical conductivity and corrosion prevention. Features chamfered entry for quick cable insertion and a visual inspection hole.

TECHNICAL SPECIFICATIONS

TECHNICAL PARAMETER	SPECIFICATION & RATING VALUE
Base Material	99.9% Pure Seamless Electrolytic Copper Tube
Surface Treatment	Heavy Electro-Tin Plated for Oxidation Resistance (BS EN 61238)
Conductor Entry	Precision Chamfered Internal Bore for Smooth Wire Feeding
Inspection Feature	Integral Visual Inspection Hole for Verified Conductor Depth
Conductor Range	1.5 mm² to 630 mm² Cable Cross-Sections (Stud Holes M5 to M16)
Crimping Compatibility	Compatible with Hexagonal and Indent Compression Crimping Tools
Current Rating	Full Rated Current Capacity of Matched Copper Conductors
Recommended Applications	Main Switchboards, Transformers, Motor Terminals, Power Distribution
